The Engineering Economist publishes articles and reviews in the following areas:

BREAK-EVEN ANALYSIS
CAPITAL BUDGETING
CAPITAL INVESTMENT ADMINISTRATION
CAPITAL INVESTMENT ANALYSIS
CAPITAL INVESTMENT (General)
COST ANALYSIS
DECISION MAKING
DEPRECIATION AND OBSOLESCENCE
ECONOMIC COMPARISONS
ECONOMIC VALUATION
ECONOMICS (Managerial)
ECONOMICS OF DESIGN
FINANCIAL MATHEMATICS
GENERAL INTEREST
INVENTION AND INNOVATION
INVENTORY
PLANNING
PRIORITY ANALYSIS
PROJECT JUSTIFICATION
PROJECT EVALUATION
RATE OF RETURN AND COST OF CAPITAL
RESEARCH AND DEVELOPMENT
RESOURCE ALLOCATION
REPLACEMENT
RISK AND UNCERTAINTY
TAXATION

INSTRUCTIONS FOR MANUSCRIPT PREPARATION

Manuscripts must be submitted in triplicate. All manuscripts should be preceded by a nonmathematical abstract from approximately 50 to 100 words. Mathematical notation should follow that which was adopted in "The Manual of Standard Notation for Engineering Economy Parameters and Interest Factors" found in *The Engineering Economist*, Volume 14, Number 2, page 91. Authors should attempt to make mathematical expressions in the body of the text as simple as possible. Displayed mathematical material should clearly indicate the alignment that is desired. If the equations are numbered, the numbers should be given in parentheses, flush with the right margin of the page. Footnotes should be numbered consecutively and typed, double-spaced, in a separate list at the end of the paper. In the text, footnotes are indicated by superscript numbers alone. Footnote numbers should never be attached to mathematical symbols. References (bibliography) should be listed at the end of the article in alphabetical order. Reference numbers within the text should be typed on the line and enclosed in brackets. Sample reference format follows.

[1] Arrow, Kenneth J., "Alternative Approaches to the Theory of Choice in Risk Taking Situations," Econometrica, 14 (October, 1951), pp. 404-37.

[2] Smith, Keith V., Portfolio Management, New York: Holt, Rinehart, and Winston, 1971.

Figures should be drafted in India ink on white paper. Lettering should be of uniform size and large enough to be legible should the figure be reduced for publication. Use heavier lines for curves than you use for the axes. Tables should be typed on a separate sheet, numbered with a Roman numeral, titles and cited in the text.

Manuscripts offered for review should be sent to Manuscript Editor, G. J. Thuesen, School of Industrial and Systems Engineering, Georgia Tech, Atlanta, Georgia 30332. Also send the name, address, and field of interest of four people outside your institution who you think are qualified to act as referees for your manuscript.

Each author's paper will be dated with the month and year of original submission as well as when an acceptable version was scheduled for publication.

Readers are invited to comment on articles and reviews.
